

Product Profile • L-Glutathione – Reduced Form 125 mg

Promotes healthy aging and reduces oxidative stress

Product Information

In the modern world, people are exposed to hundreds of chemical toxins that did not exist three generations ago. The human body needs extra help to repair the damage caused by stress, pollution, radiation, infection, drugs, poor diet, injury, and aging. These conditions produce free radicals that cause oxidative stress in the cells of the body. The resulting cellular damage significantly contributes to aging and a host of degenerative diseases.

The body has natural antioxidant defences to combat oxidative stress. The most powerful and abundant antioxidant in human cells is L-glutathione, but it is difficult to get enough from food alone. Any illness (even a bad cold), exposure to pollutants, and aging can cause an L-glutathione deficiency. In turn, L-glutathione deficiency has been shown to contribute to oxidative stress and disease, resulting in a vicious cycle. Daily supplementation with L-glutathione has been shown to contribute to healthy aging and disease prevention.

A recent human study showed that L-glutathione, in chewable tablet form, produced reductions of approximately 20% in one of the markers for oxidative damage. Since aging and most degenerative diseases are caused by oxidative damage, this new research provides supportive evidence for the effectiveness of oral L-glutathione supplements. Clinical studies have shown that treating Parkinson's disease with L-glutathione decreases impairment and disability. Other studies indicate L-glutathione can help reverse certain cancers, including leukemia, cervical carcinoma, and neuroblastoma.

How L-glutathione works:

The biologically active form of L-glutathione is the reduced form and it works in two important ways. As an antioxidant, the L-glutathione molecule neutralizes a free radical molecule by "donating" an electron to it. It also scavenges free radicals by creating glutathione peroxidase – an important antioxidant enzyme involved in enzymatic antioxidant defense mechanisms. As a detoxifier, L-glutathione binds with heavy metals, toxic chemicals, and drug metabolites. This renders the toxins water-soluble so they can be flushed from the body. In the process, L-glutathione is used up. To maintain the body's defences, L-glutathione must be replenished.

ITEM CODE 2816
SIZE 90 chewable tablets
WHLS \$19.35

Sealed for your protection. Do not use if seal is broken. Contains no artificial colour or sweeteners; no dairy, soy or wheat.

Each Tablet Contains:
 L-Glutathione (Reduced) 125 mg

Non-medicinal ingredients: Dextrose, fructose, xylitol, stearic acid, silica, vegetable grade magnesium stearate (lubricant), natural berry, blueberry, and raspberry flavours, sucralose.

Recommended Adult Dose: 1 chewable tablet, 4 times daily or as directed by a health care practitioner.

Recommended Use: As an antioxidant, glutathione helps to reduce oxidative stress and is a factor in healthy aging.

Caution: Consult a health care practitioner if you are pregnant or breast-feeding. Keep out of reach of children.

For freshness, store in a cool, dry place.

L-Glutathione
 Reduced Form · Forme réduite

125 mg

90 Chewable Tablets / Comprimés à Croquer

ANTIOXYDANT · ANTIOXYDANT
TROPICAL FRUIT FLAVOUR · SAUVEUR DE FRUITS TROPICAUX

Scellé pour votre protection. Ne pas utiliser si le sceau est brisé. Sans colorant ou édulcorants artificiels; sans produits laitiers, soja ou blé.

Chaque comprimé contient :
 L-Glutathion (réduit) 125 mg

Ingédients non médicinaux : dextrose, fructose, xylitol, acide stéarique, silice, stéarate de magnésium d'origine végétale (lubrifiant), arômes naturels de petits fruits, de bleuet, et de framboise, sucralose.

Posologie recommandée (adultes) : 1 comprimé à croquer, 4 fois par jour ou suivre les recommandations de votre praticien de la santé.

Usage recommandé : Le glutathion est un antioxydant qui aide à réduire le stress oxydatif et à vieillir en santé.

Attention : Consulter un praticien de la santé en cas de grossesse ou d'allaitement. Conserver hors de la portée des enfants.

Pour conserver la fraîcheur, garder au frais et au sec.

Where Great Health Begins

L-Glutathione – Reduced Form 125 mg

Why unique:

- Natural Factors L-Glutathione is a naturally-produced form that delivers superior results over chemically-produced, synthetic L-glutathione; it is manufactured through a patented yeast fermentation process that yields a high percentage of L-glutathione and is non-GMO
- Potent cellular detoxifier that removes heavy metals and other harmful toxins
- Effectively neutralizes free radicals, providing excellent antioxidant protection
- Over 60,000 medical articles have been published on L-glutathione
- Convenient chewable tablets with a delicious tropical fruit flavour

Ideal for:

- Replenishing L-glutathione as levels decline with age, especially beyond age 45
- Replenishing L-glutathione depleted due to disease conditions
- Reducing oxidative stress due to exposure to toxins
- Protecting against degenerative diseases associated with free radical damage

Who should use:

- Anyone who wants to reduce the aging effects of oxidative stress
- People suffering from chronic or degenerative diseases
- Anyone chronically exposed to heavy metals or toxic chemicals, or to excessive UV or other radiation
- Anyone with hyperpigmentation, especially on the face or hands
- Smokers or those exposed to second-hand smoke, or those who drink alcohol on a regular basis
- Athletes and others who engage in regular physical activity, which can increase oxidative stress

Each tablet contains:

- L-Glutathione (Reduced).....125 mg

Dosage:

- 1 chewable tablet, four times daily or as directed by a health care practitioner

Safety:

- Data from human and animal studies shows L-glutathione to be exceptionally safe. Natural L-glutathione has been approved for use in Japan for over 40 years as an aid to healthy aging
- *Pregnancy and lactation:* Suitable for pregnant or lactating women
- *Children:* Suitable for children at one half the adult dose
- *Drug interactions:* No known adverse interactions. L-glutathione decreases the toxic side-effects of certain chemotherapy drugs
- *Contraindications:* None known
